STYLE FILE Belt

clips aren't the only way for geeks to carry their gear. The Scott eVest (\$160), made of a water-repellent, cotton-blend fabric, conceals a dozen pockets that are designed for everything from laptops to PDAs. Velcro tabs along the edges hold wires in place, and an opening near the neckline keeps your cell phone's earpiece handy. The eVest comes in black and khaki. A version for women is on the way.
